This Easy “*Tax-Free*” Income is Overlooked by 99% of Small Home Business Owners and Entrepreneurs!

Villa Park, IL. December 13, 2011 - Thousands of dollars of this “Easy Income” is overlooked by 99% of small home business owners based on new research by the Foundation for Financial Freedom. Simply doing business at home and this “one activity” that’s already being performed, can provide any home business owner with this easy “Tax-Free” income, they just don’t realize it.

“It’s (3) benefits in (1) for the 99% who own small home businesses to gain; 1) thousands of dollars of Tax-Free income, 2) the same thousands of dollars as a tax deductible business expense to save money, plus 3) ancillary business expenses as new tax deductible saving”, said Gary Shorter, President of the Foundation. “It’s one simple activity that every home business owner already performs that they’re not taking advantage of for thousands of dollars of Tax-Free money, that CPAs miss because it’s hidden at the end of IRS rules and not readily apparent.” Shorter said.

Get this revealing “must have” Research Report that will show every business owner how to take advantage of this Tax-Free income, online at the Foundation’s website: www.FoundFreedom.org

The Foundation for Financial Freedom is intent to be a not-for-profit organization, focused on educational services and market research to help everyone gain control of your financial future and be recognized as - *Your Tax-Free-Money Specialist™*.
